

HWS GROUP

2000 **20+** **160+**
FOUNDED NATIONALITIES EMPLOYEES

We have IT in our veins - that's why we have been the reliable IT service partner from the heart of Franconia for small and medium-sized enterprises and enterprise customers for over 20 years. Our more than 160 employees are specialists in future-oriented IT projects - from consulting to planning, architecture to implementation and operation of modern IT infrastructures.

We see ourselves as a direct partner who recognises IT trends and risks at an early stage and always keeps the IT landscape of all customers up to date.

We have #IT IN OUR VEINS

STRONG PARTNER

Driving force HWS

Modern service designs, the latest trends and future-oriented technologies - we have our finger on the pulse of IT for you. Continuous development of our internal skillsets form the basis for our proactive service philosophy. Our dedicated innovation team proactively develops solutions for continuous service optimisation in order to further develop your IT infrastructure in a future-proof manner.

Smart Solution Design

We know that every business is unique. That's why we offer you customised IT solutions - individually adapted to your respective business requirements. Our architects and DevOps experts work together to develop modern infrastructures that are failsafe and high performing.

From Franconia to the world

From our Franconian headquarters in Neustadt a/d Aisch, our multinational team takes care of regional and global projects for international clients. We combine the best of German medium-sized businesses and international tech business. For maximum agility, we combine onshore, off-shore and nearshore delivery centres as needed.

IT CONSULTING

You have big plans! With the right digital strategy, you are well prepared for the future developments in your industry.

Benefit from our consultants' many years of IT expertise in the upper medium-sized business sector as well as in the enterprise sector.

As part of our customer-centric project management, we provide you with an individual project manager as a direct contact person. Based on your goals, we work with you to develop the right technology mix for your long-term business success. From the architecture to the selection of the right hosting and cloud models to a comprehensive managed services strategy: our solutions accelerate your business processes and secure your company's success.

IT SERVICES

As an agile IT outsourcing and services partner, we increase the uptime of your machines and the performance of your IT infrastructure and departments. We take a holistic approach that looks at all components of your infrastructure.

Intelligent automation for administration and monitoring complete our portfolio. Our Continuous Service Improvement offers you proactive solutions for improving processes and the technologies used. In addition to the complete new construction of (sub-) systems, we also take over the support & maintenance of your existing IT landscape. Thanks to the assumption of repetitive administration tasks for user requests or in the area of application support, we enable you to supervise your specialists with value-adding tasks that pay off for your business success.

SOFTWARE DEVELOPMENT

Your IT is as individual as your company. We therefore support you in the development and enhancement of individual software solutions that meet your business requirements.

Our modern software development approach is based on agile methods from Scrum and DevOps. Our agile developer teams work primarily on the basis of Java, C# and Python. Our Scrum masters also lead cross-company teams within the framework of contract development processes. As an extended workbench and innovation provider, we complement your own development teams - if available - with our knowledge and (wo)manpower. In addition to third-party contracts, we also develop and distribute the IAM solution DoubleClue based on Java.

WE HAVE #ITINOURVEINS

» *Whether onsite, offsite or nearshore, the experts from HWS always keep pace with our systems.* «
Cooperative and competent.
